# *Fume Extraction Scrubber Systems*

**V.K. PLASTICS**, We focus on the design of environmentally friendly products such as effluent treatment system and air pollution equipment. We expect that the series of environmental protection equipment can leave clean air to the earth. The blades in our fan are specially designed and precisely machined so as to obtain the highest efficiency, When fitted with our mist eliminators, the system performs scrubbing effect with low pressure drop, high air flow and high efficiency.

A-1 Pollutech, carries a full selection of equipment for your electroplating line, Including both pre-treatment and post treatment options.

Our equipment lines include usual the items such a tanks, filters, pumped filtration system, hanger, frames and power supplies, but we also carry many unique and specialized products that we can apply to your specific plating needs.

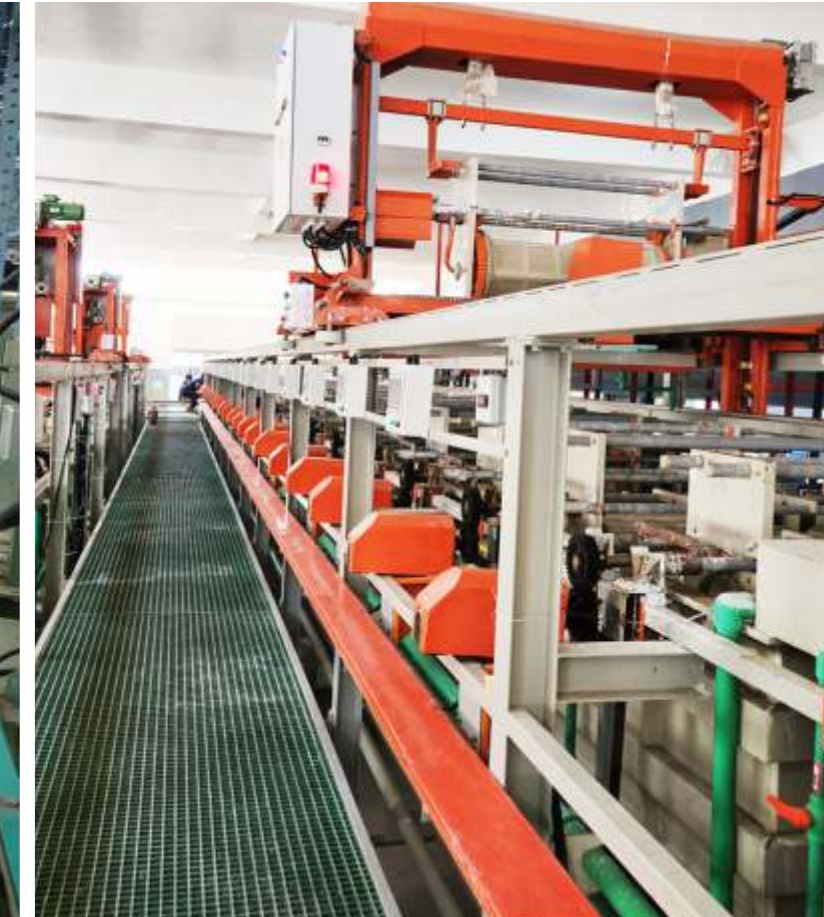

We also can help design your process, whether it be manual or fully automatic plating line let us put our expertise to work for you.

# Automatic Wet Plating Line

**Any Idea, Plan Or Purpose May Be Incorporated Through Brainstorming.**

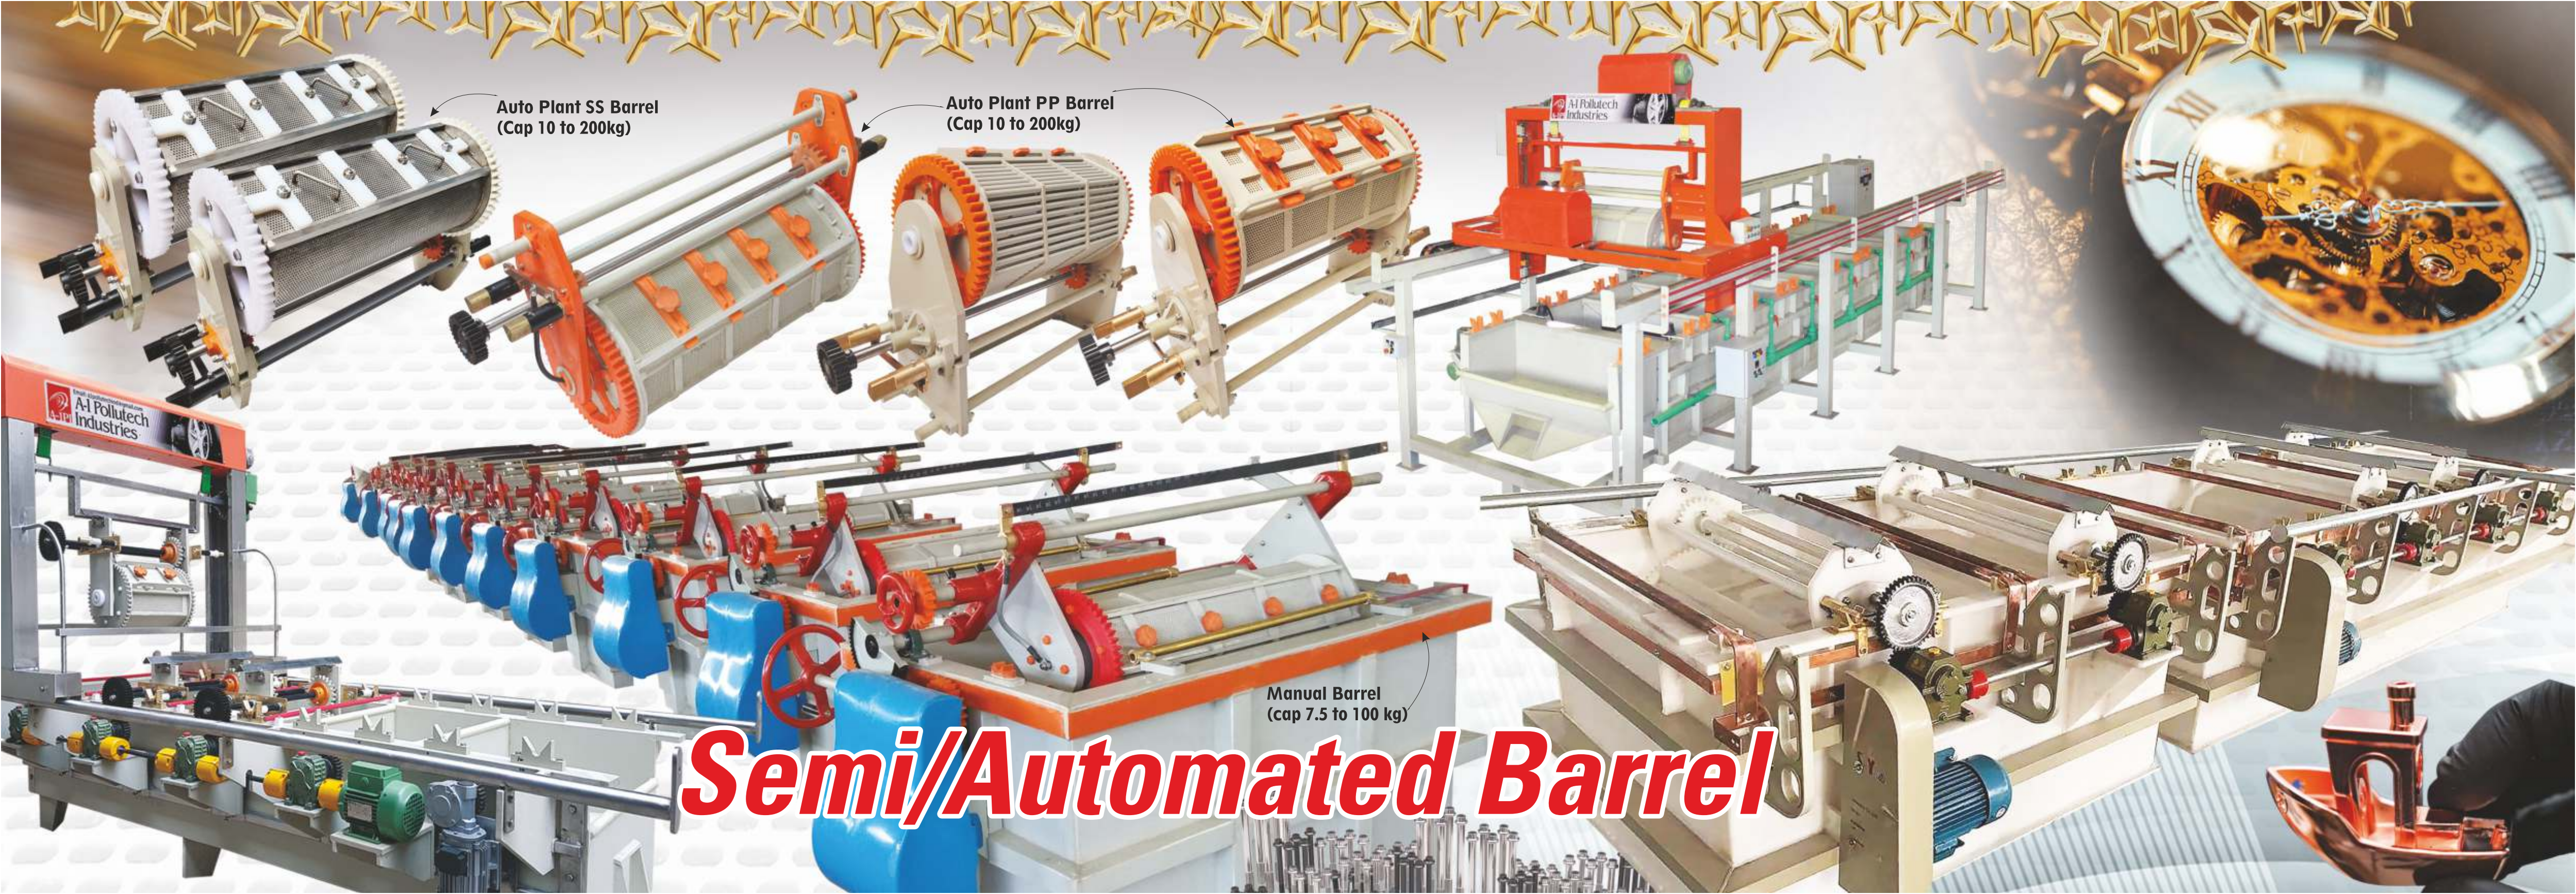

# Automatic Barrel Plating Line

Auto Plant SS Barrel  
(Cap 10 to 200kg)

Auto Plant PP Barrel  
(Cap 10 to 200kg)

Manual Barrel  
(cap 7.5 to 100 kg)

# ***Semi/Automated Barrel***
